UPPER HUTT BRANCH

Pest Free Upper Hutt Backyard Trapper Signup Form

Pest Free Upper Hutt is a community-led programme that is embarking on an ambitious project to get our valleys resonating with birdsong and crawling with lizards ! We will see flocks of tui and kereru weaving around our trees and across valleys, and hear the melodious call of bellbirds and chatter of silvereyes. But currently nestlings are being ravaged by rats and stoats, and possums are eating their food source, the native trees and bush.

We aim to control to low levels, and eventually remove, all wild mammalian predators in Upper Hutt in order to protect native wildlife. We invite you to be a backyard trapper to help in this project.

Graham Bellamy, Chair Forest & Bird, Upper Hutt
