

# Pest Free Upper Hutt

Local people working together  
to bring back birdsong.

**Predator Free NZ 2050 needs your help.**

Our native birds  
are in trouble.

Rats, stoats  
and possums  
are killing them  
in huge numbers,  
every night.

Without pest control  
many species will  
disappear in our  
children's lifetimes.

**But together, we can save them.**

Pest Free Upper Hutt is a community volunteer group. Our members trap rats, stoats and possums in urban and rural areas. The more we trap, the safer our tui, kereru, bellbirds, and other birds – and their eggs and chicks – will be.

Want to help? Join us!

Operating a trap in your backyard takes only a minute of your time, but makes a huge difference.

A local Pest Free co-ordinator can provide you with a trap and wooden safety tunnel for a koha, and show you how to use it. Let's bring back birdsong to Upper Hutt!
